HONGKONG, MAY 47H, 1895. THE Royal Commission appointed by the Government of New South Wales to inquire should be required to give honestly his saved into the working of the Civil Service of that | colony with a view to retreachment has made its report. The report points out that "commission after commission has sat "throughout the great English-speaking "colonies to inquire into the causes which "had made the Civil Service a byword and a "reproach." The subject possesses some interest for us in Hongkong in view of the report of our own Retreachment Committee, and the similarity of some of the conclusions arrived at. In the Hongkong report the following passage occurs:-"In "cases such as the Magistracy, the Post "Office, and the Harbour Office, amongst where the head of the depart: stated that it is unpossible to carry out the duties of where we have been unable to make further commencing at 9.30 p.m., weather permitting. "investigation into the matter, we are "necessarily not in a position to make any "recommendation in favour of any retrench-"men, but we beg to call the serious atten-"tion of the Government to this point." In New South Wales the Commission appear to have had before them a good many heads of departments who were of opinion that no reduction of staff was possible. "Surprise hoisting code pennant C., to convey men ashore "is expressed"—we quote from the summary of the report given by the Sydney Morning Berald -" at the anathy displayed by some "of the heads of the Civil Service on the "subject of Civil Service reform, and the "Commissioners were unprepared for the "assurances given by a number of the per-"manent heads of departments and sub- plague patients, so that the colony is now free "departments that the service is, as a rule, of the disease. 'not overmanned nor overpaid; that it is efficient, and that political patronage has Charles Mitchell, the Governor of the Straits exercised. The Commissioners Settlements, will shortly visit London in con-"can only conjecture that gentlemen so We (Singapore Free Press) believe that there is "testifying are either ill-informed or are at present no such arrangement contemplated. insensible to the nature and gravity of His Excellency goes on short leave in June to is both over-manned and overpaid; that it includes a number of incompetent or and Nethersole Hospitals begs to acknowledge inefficient officers; that its modes of procedure are more or less antiquated; that the and rapid depatch of public business 18 not its main object; that favouritism prevails in many quarters, and that it is a means of providing employment for relatives and friends of political adherents. The Commissioners' opinion on this subject is as follows:- " After the best examination " we have been able to make of the system.

" we have come to the conclusion that, while |

ANOTHER CAPTURE BY PIRATES IN TONKIN.

A FAMILY ABDUCTED.

Tonkin has been thrown into a state of agitation by the abduction of a Enropean family by pirates, M. Lyaudet, manager of the Kebao coal mines, and his wife and daughter having been carried off in a daring raid at Port Wallut. It appears, from the account given in the Courrier of the 27th April, that the family occupied large mat shed. Like all the houses of the Company's servants, it has been guarded every night, since pirates were known to be in the neighbourhood, by a sentinel, a militiaman who kept guard on the verandah on the seaward-wide. On machinery were still being shipp d'to Japan | the night of Wednesday, 24th April, the sentine that it was evident she would be supplying other was at his post. Two hundred metres away the armed junk of the Quang-yen Residency was at anchor and, in accordance with orders the steam launch of the same Residency should have been at anchor with steam up in front of the General Manager's house at the entrance to the bay. A gunboat also has been lying in the harbour of Fort Wallut, but unfortunately it was not there, having gone the sume evening to Kebao, where there was another gambost, About half-past ten the alarm was given Two sampans carrying forty well armed pirates clided in under cover of the darkness, coming it in believed from the Dam-ha side, without being seen until the last moment, when the men leaped ushore and made a rush for the Lyaudet house, The sentinel fired, and some of the pirates fired in reply, and while some of them kept watch the great body of them entered the boase. In less than five minutes M. Lyaudet, Madame Lyander, and their little daughter were thrown into the boats, which immediately put off, and were lost sight of in the darkness between Kabao Island and Zabiaca Island.

His Excellency goes on short leave in June to at present limit the reserve fund to one-third of time they arrived not a trace of the pisates was population, into whose hands trade has an increasing the paid-up capital (£166,666), notice is given to be seen. Half-an-hour later a locomotive left ing tendency to pass. The principal contribution Meantime M. Portal searched the harbour with a percentage levied upon the rateable value and existence during its notive period, and alone breath of scandal may utter in connection with the steam-launch, but without result. The of property in Victoria, which is practically the receiving the mental impressions of that period, other forms of sport, no one would ever dream The Straits Times of the 23rd April says: Flaviales boat Tac-hat, which came in from only centre of population in the colony. The A case in which was shown the plack of a young Moneay, also made a femitless search. Next total amount of this rate is \$470,000, and the lady occurred in Singapore in the early hours morning M. Benoit, Resident of Quangyen, share contributed by the Chinese population is at Dre-den to drive street cars on a line about of this morning. At that hour some depre- who had been informed of the occurrence, set out \$305,500. There is a stamp duty to which the 3 miles long. being Il miles long by two to five miles wide. representing all the Straits. Like Gibrastar it is a fortified rook, of which the batteries protect a free port. Its harbour is one of the most magnificent in the world, and its interests are wholly based upon its strategio and commercial position. Its situation

peculiar facilities for trade with China, and its population is either military and naval or comnercial. These are not, as a rule, the populations in which self-governing institutions have been found to flourish. In Hongkong there is the further difficulty that a very large majority of the population is composed of Chinamen, wh are totally unacoustomed to the responsibilities

The petition does not very clearly define the powers to which claim is made. The most important appear, however, to be the righof free election of representatives of British nationality in the Legislative Council of the colony, a majority in the Conneil of such elected representatives, perfect freedom of debate, complate control in the Connoil over local expendi ture, and the management of local affairs Everything that is desired by the petitioners would practically result from the free election of a magority of representatives in the Conneil and the complete control of local expenditure. But the first question which will be asked on considering the terms of the petition will be the exact meaning of the phrase "free election of repre-

sentatives of British nationality in the Legislative Council of the colony." If it means election f persons of British nationality by a vote of British nationality to the exclusion of the Portuguese, Germans, Americans, and Chinamon. who form the bulk of the population, it would mean the government of the majority by a very small minority of the inhabitants. If, on the other hand, it means the election of representatives of British nationality by the entire popula but in later stages embryos are killed, unless tion, it would involve the domination of the loxygen is added to counteract the effects of the

Excluding the garrison, which would not presumably be endowed with voting powers, the ure as follows: -British, 1,400; Portoguese, chiefly Germans and Americans. The numbers of the adult males of the civil British and Chinese no plations compare as follows:-800 British, 127,000 Chinese, or a proportion of one British vote for 160 Chinese vote That it should be proposed to restrict the lalectoral franchise to the 800 British voters seems scarcely a possible proposition to put forward in the name of self-government, but that it should, on the other hand, be proposed to i place the affairs of a post of such Imperial importance as Hongkong at the discretion of a toreign and Chinese vote of overwhelming strongth is no less incredible. Until this initial difficulty has been explained, it seems scarcely

necessary to discuss the proposal in detail. Regarded as a movement in the direction of self government, the patition haturally suggests

upon without calling for the intervention of the House of Commons. The vexed question of the amount of the military contribution has not improbably much to do with the movement which has been set on foot, and the petition, if it means nothing else, may be accepted as an emphatic expression of the colony's desire to be consulted.

A FAR EAST CRICKETING TOUR IN ENGLAND.

Dr. Fox, the Straits crickster, was here to-day with his wife, they being passengers for England insulators. As this metal takes fire on contact, by the White Star liner Oceanic, which is with water, its presence in places where gas from going home for repairs and, therefore, paying an leaky mains is likely to accumulate is a new and unusual call at Colombo. Our readers will remember that Dr. Fox was last here in 1393 with the Straits crinketers, and he was also one of the new troops was that most of the recruits the players against our team when we sent repre- side of Paris-had 3.8 electric lighting stations were opium amokers. SCIENTIFIC MISCELLANY

Land animals and plants are distributed zones whose limits follow lines of equal temerature, but just when the temperature exerts its restraining influence has been a matter of angertainty. In his recent study of the problem for the United States, Dr. C. Hart Merriam has considered that not only the mean temperature but also the total quantity of heat in particular zones must have an influence. He measures the total quantity of heat by the sum of the excesses over 43 deg., the temperature at which hysiological solivity in plants and reproducive activity in anim is are assumed to com mence, and arbitrarily takes the six hottest consecutive weeks of summer as the hot spason of he year. Charts constructed according to these considerations, and compared with a chart of lifo zones as mapped two years ago, show sarorising coincidences, leading Dr. Merriam to conclude that the various zones of the different species are limited porthward by the total quan ity of heat during the season of growth and reproduction, and southward by the mean temperature of the hottest part of the year. The overlapping of northern and southern types on the Pacific Coast is explained by this the ry. as here only is a high total of heat combined with

very mild summer. An incubator for hatching hen's eggs under reduced atmospheric pressure has been devised ov Prof. C. Giacomini, an Italian embryologiat who expects the apparatus to prove a valuable aid in the study of teratology. Reduced pressure in the early days of development incites various monstrosities, besides retarding growth,

In a comparison of several thousand cases, Dr. numbers of the civil population of Hongkong Korosi of Buda Pesth, finds the proportion of deaths from weakly constitutions, or maladies their superiority over Cambridge in the minds 2.000: Chinese, 211.000; and the remainder traceable to the mother, to be twice as great among children of mothers under 20 as among those of mothers over 30.
